'Number Cube' Games

"Act It Out"

- Player rolls the number cube and reads the value
- Player must then act out an action as many times as the value of the cube
  (Example: Jump six times, blink your eyes three times, touch your toes five times, etc.)

"More/Fewer"
- Each player rolls their number cube and reads the value
- The player with the highest value says "more"
- The player with the lowest value says "fewer"
- If the players have the same value, both shout "equal"

"Add Them Up"

- Players take turns rolling the number cubes and adding up the values
- Say or write a math sentence about the number cubes
  ("2 and 3 is 5" or "2+3=5")
