

Observing Attributes Games

- I Spy
 - Say "I spy with my little brown eye something that is"..."round like a ball" or "red" or "comes in sets of two."
 - To make it more challenging, increase the attributes to two. For example, say, "I see something with four legs that is bigger than a can of soup" (a dog).
 - Have your child guess what you have spied, or be the person saying "I spy..."
- Categories
 - Name a category of items found around you, such as "furniture you can sit on."
 - Walk from room to room of your home and get your child to say "yes" or "no" to whether or not an item seen or named fits in the "furniture you can sit on" category
